

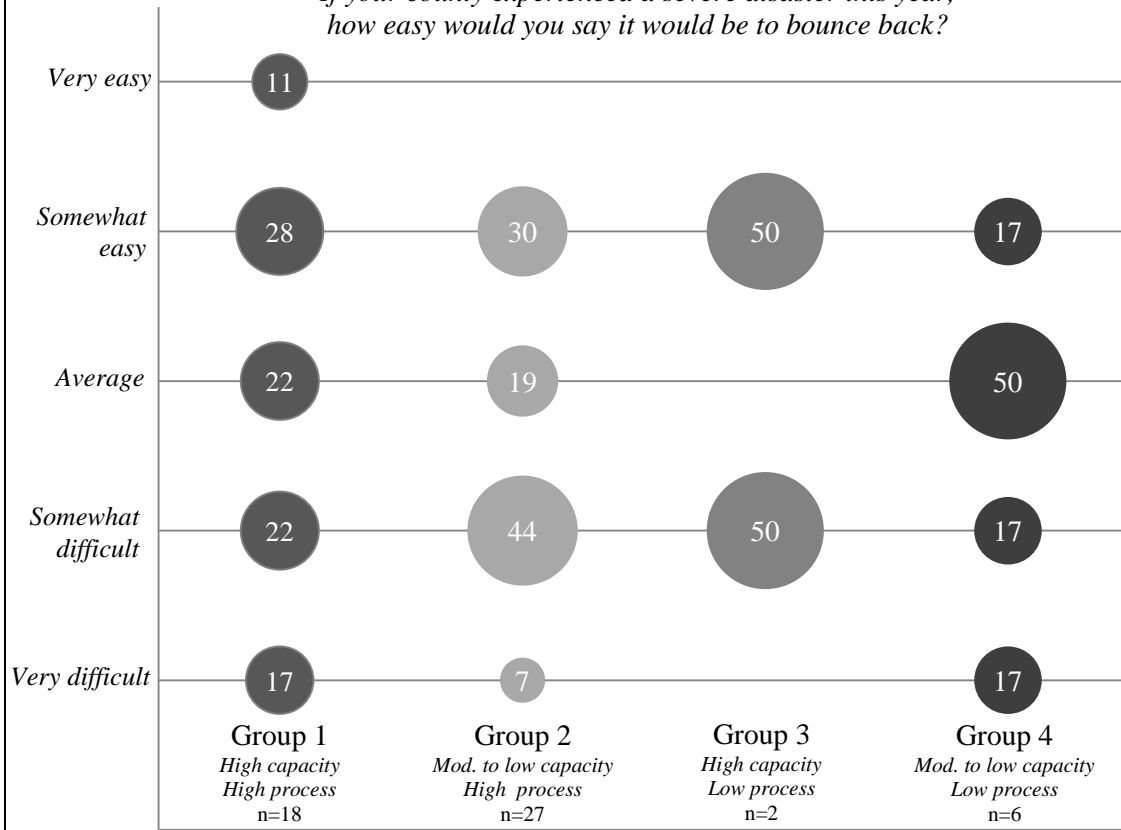

Figure 7.2: Perceptions of County Resilience

If your county experienced a severe disaster this year, how easy would you say it would be to bounce back?

Percentage of Responses by Resilience Group

Source: Author’s original survey of county emergency managers.

Notes: The size of the bubbles corresponds to the percentage of responses given for each category; the percentage is also noted by the number inside the bubble. Note that the number of cases for Group 2 is reduced to 27 due to missing (nonresponse) data.
